

SECURITY CERTIFICATE

TESTARMY GROUP is a consulting firm carrying out security audits as well as penetration tests. We hereby confirm we have conducted a code review and penetration tests of <https://github.com/handsontable/handsontable/releases/tag/15.3.0>

Penetration tests were conducted using the white-box method for the open-source JavaScript component available at <https://github.com/handsontable/handsontable/releases/tag/15.3.0> covering all available functionalities. The component underwent static, dynamic, and manual code analysis for security verification against the OWASP ASVS standard guidelines, with a focus on the OWASP TOP 10. Additionally, a dependency and dev dependency analysis was performed.

TESTARMY GROUP confirms that Handsontable have built the application with security in mind, including best security practices.
